

STELVIO

THE LEGACY IT CARRIES

The courage to reach further — it's what sets this Brand, its designers and its drivers apart. Racing still serves to prove and inspire Alfa Romeo design, long known to be geared for both track and street. It has produced a wide range of innovative vehicles that are now hailed as classics.

1910 The 24 HP was the very first car produced at the ALFA factory, with a top speed of 99 km/h (62 mph). The "Corsa" version of the 24 HP stood out at the 1911 Targa Florio.

1929 Enzo Ferrari began as a test driver for Alfa and soon took charge of the entire racing program. He established "Scuderia Ferrari" in Modena, modifying and tuning every Alfa Romeo race car, resulting in a winning record that still shines brightly on the Alfa Romeo name.

1932 In the 1930s, the Vittorio Jano-designed Gran Premio Tipo P3 was a force — it clocked an unheard-of top speed of 233 km/h (145 mph). It took 46 Grand Prix checkered flags in a three-year period.

1938 Alfa Corse, the in-house racing team for Alfa Romeo, prepared four 8C 2900B cars for the 1938 Mille Miglia, continuing to dominate there by taking the top two positions.

1953 A derivation of the Alfa Romeo 6C 3000 prototype increased engine capacity to 3,495 cc and produced a top speed of 251 km/h (156 mph). It was the winner of the first Gran Premio Supercortemaggiore held in Merano in 1953.

1954 Alfa Romeo introduces Giulietta in several different street models along with a competition-only two-seater, the Giulietta Sprint Zagato. Its all-aluminum and plexiglass construction achieved optimal power and weight ratios with lightweight strength innovations.

1965 Production of subsequent Giulia models for both road and track continued on and off for decades to come, achieving numerous class wins in demanding events such as the 24 Hours of Le Mans, the Targa Florio, 12 Hours of Sebring and the Nürburgring 1,000 km (621 miles).

1967 Enter the Tipo 33 Stradale — often called the most beautiful car of all time. With only 18 produced, the car is extremely rare. The value of each is almost impossible to determine as the 33 Stradale is hardly ever traded.

2015 After the long-awaited North American introduction of the Alfa Romeo 4C, June 2015 revealed the new Giulia Quadrifoglio, the most impressive reincarnation of the Giulia to date, featuring a whole new level of power-to-weight engineering.

2016 The Alfa Romeo Stelvio was the very first high-performance compact luxury crossover SUV manufactured and marketed by Alfa Romeo. Stelvio was first revealed at the 2016 Los Angeles Auto Show and entered production at the Cassino Plant in Italy at the end of 2016. It is named for the Stelvio Pass: Italy's highest mountain pass, noted for its thrilling switchbacks.

CATEGORICALLY EXCEPTIONAL

The Alfa Romeo Stelvio infuses motoring's most legendary DNA into a unique and highly adept SUV. The result? A spirited, confident performance worthy of being named after the fabled Stelvio Pass. This is an SUV designed to impress engineers, accelerating beyond all expectations with honed aerodynamics and formidable horsepower. This year's Tributo Italiano model features the colours of Italy and sporty details that pay tribute the Brand's racing legacy. It's no wonder that an SUV from Alfa Romeo instills finesse, performance and prowess into a category built on practicality and capability. Stelvio was built to be the SUV of the car connoisseur's dreams.

GAINING TRACTION

The Q4 All-Wheel Drive (AWD) system offers the performance and driving pleasure of Rear-Wheel Drive (RWD), switching to AWD only when warranted. Under normal conditions, the Q4 AWD system sends 100 percent of the engine torque to the rear axle. When necessary, the system can automatically transfer up to 60 percent of the torque to the front axle, thanks to the Active Transfer Case (ATC). It continuously monitors road conditions to deliver enhanced torque distribution, maximizing grip and performance.

A LA MODE

The Alfa DNA Drive Mode Selector instantaneously adapts the behaviour of the vehicle to the selected driving mode. The system automatically resets to "Natural" at the vehicle start while retaining the ability to change modes at any time.

DYNAMIC opens the dual-mode exhaust and delivers a sharper throttle response, enhanced steering feedback and performance shift-mapping for sporty on-road driving.

NATURAL is a comfort setting for a perfect balance in daily driving and is calibrated to be the default setting.

ADVANCED EFFICIENCY is engineered to deliver maximum fuel efficiency.

COLOUR COLLECTION

Alfa Rosso

Milano White

Verde Fangio Metallic

Rosso Etna

Moonlight Grey Metallic

Misano Blue Metallic

Vesuvio Grey Metallic

Vulcano Black Metallic

Veloce shown in Alfa Rosso.

1) Never program while driving. GPS mapping and 3D navigation may not be detailed or available in all areas or reflect current road regulations. 2) Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice controls, when it is safe to do so. Requires compatible iPhone. See retailer for phone compatibility. Data plan rates apply. Wireless use of Android Auto requires a compatible Android 11+ phone and compatible active data plan. Check g.co/androidauto/requirements for compatibility. 3) **If you decide to continue service after your trial, the subscription plan you choose will continue and you will be charged according to your chosen payment method at then-current rates unless you cancel your services.** Fees and taxes apply. Some services and features are subject to device capabilities and location availability. Please see the SiriusXM Customer Agreement at www.siriusxm.ca/terms for complete terms and how to cancel, which includes calling SiriusXM at 1-888-539-7474. All fees and programming are subject to change, provided that we will notify you in advance of any price change. We use personal information in accordance with our Privacy Policy, available at www.siriusxm.ca/privacy. 4) This is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of their surroundings and be prepared to take corrective action to avoid collisions. 5) Not compatible with all garage door openers. 6) Traffic Sign Recognition is not a substitute for safe and attentive driving. Factors including weather and condition of the traffic sign can impact the recognition and display of the sign. Always check traffic signs visually while driving. 7) Highway Assist System (HAS) requires the driver to keep his or her hands on the steering wheel at all times. This system is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and maintain control of the vehicle. 8) Traffic Jam Assist requires the driver to keep his or her hands on the steering wheel at all times. This system is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and maintain control of the vehicle.
